**Subject:** drug testing

I am a paruretic -fortunately self employed - who would never be able to pass a drug test if it required a urine sample provided under monitored conditions. Please allow for alternative testing opportunities for those, like myself, afflicted with this disorder. If you had any idea as to the disruptive effect this mandatory method of drug testing can have on an individual's life, I'm sure you would register a loud vote for such a simple fix. Not all people who are unable to produce urine samples on demand are drug users. Please help us.
